ANNUAL INDEX OF AUTHORS AND TITLES

Volume 16 (January-December 1966)

Journal of the Air Pollution Control Association

AUTHOR INDEX

Adams, D. F. Problems of relating atmospheric analyses to effect of air pollution on agriculture. 16(4) 219–223

——. Absorption of hydrogen sulfide and methyl mercaptan from dilute gas mixtures. 16(5) 248–253

——. An air quality study in the vicinity of Lewiston, Idaho, and Clarkston, Washington. 16(6) 314–316

Airth, J. M. The metal content of urban air. 16(2) 77–78

Altshuller, A. P. Continuous monitoring of methane and other hydrocarbons in urban atmospheres. 16(2) 87–91

——. An evaluation of techniques for the determination of the photochemical reactivity of organic emissions. 16(5) 257–260

Ammons, B. E. The use of hypodermic needles as critical orifices in air sampling. 16(4) 197–200

Amsler, R. L. Formation of oxides of nitrogen in pulverized coal combustion. 16(8) 442–445

Amtower, R. E. Gas dilution apparatus for preparing reproducible dynamic gas mixtures in and desired concentration and complexity. 16(11) 618–623

Anderson, E. W. Air pollution considerations in the planning and zoning of a large, rapidly growing municipality. 16(3) 157–158

Baecht, W. Enhanced desorption of atmospheric samples and activated carbon. 16(7) 383–385

Bauer, E. R., Jr. Formation of oxides of nitrogen in pulverized coal combustion. 16(8) 442–445

Belyea, H. A. Air pollution considerations in the planning and zoning of a large, rapidly growing municipality. 16(3) 157–158

Benforado, D. M. Fume control in rubber processing by direct-flame incineration. 16(12) 673–676

Benjamin, M. An example of planning for pollution control in kraft pulping. 16(3) 128–130

Bernhart, A. P. Air pollution considerations in the planning and zoning of a large, rapidly growing municipality. 16(3) 157–158

Berry, A. E. Air pollution considerations in the planning and zoning of a large, rapidly growing municipality. 16(3) 157–158

Bienstock, D. Formation of oxides of nitrogen in pulverized coal combustion. 16(8) 442–445

Binkowski, F. S. Comparison of wind at 500 feet over Minneapolis and Louisville with geostrophic wind. 16(8) 407–411

Blomquist, E. T. Federal activity in developing air quality criteria. 16(10) 530–531

Boone, R. E. Dynamic calibration of an acid aerosol analyzer. 16(6) 310–313

Boubel, R. W. A study of field burning under varying environmental conditions. 16(9) 481–484

Bozsin, M. Air pollution abatement in the ceramic industry. 16(6) 332–333

Brandt, C. S. Agricultural burning. 16 (2) 85–86

Brennan, E. Effect of nitrogen nutrition on the response of tobacco to ozone in the atmosphere. 16(4) 191–196

Brice, R. M. The exposure to carbon monoxide of occupants of vehicles moving in heavy traffic. 16(11) 597–600

Brooman, D. L. Concentration and recovery of atmospheric odor pollutants using activated carbon. 16(1) 25–28

Burleson, F. R. Contribution of burning of agricultural wastes to photochemical air pollution. 16(12) 685–690

Cederlöf, R. On the determination of odor thresholds in air pollution control—an experimental field study on flue gases from sulfate cellulose plants. 16(2) 92–94

Chiarenzelli, R. V. The effects of air pollution on electrical contact materials: a field study. 16(3) 123–127

Clarke, J. F. An evaluation of CO_2 measurements as an indicator of air pollution. 16(4) 212–218

Cleeves, G. A. A low-level air sampling and meteorological sounding system. 16(4) 207–211

Clemons, C. A. A low-level air sampling and meteorological sounding system. 16(4) 207–211

Cole, A. F. Summer ozone concentrations in southern Ontario in relation to photochemical aspects and vegetation damage. 16(4) 201–206

Conner, W. D. An inertial-type particle separator for collecting large samples. 16(1) 35–38

Corn, M. Polynuclear aromatic hydrocarbons associated with particulates in Pittsburgh air. 16(2) 67–71

Cunnan, J. F. The development of air contaminant emission tables for nonprocess emissions. 16(7) 362–366

Daines, R. H. Effect of nitrogen nutrition on the response of tobacco to ozone in the atmosphere. 16(4) 191–196

Dammkoehler, A. R. Inventory of emission for the city of Chicago. 16(3) 151–155

Darley, E. F. Studies on the effect of cement-kiln dust on vegetation. 16(3) 145–150

——. Contribution of burning of agricultural wastes to photochemical air pollution. 16(12) 685–690

DeGroot, I. People and air pollution: a study of attitudes in Buffalo, N. Y. 16(5) 245–247

Deland, R. J. Comparison of wind at 500 feet over Minneapolis and Louisville with geostrophic wind. 16(8) 407–411

DeMaio, L. Polynuclear aromatic hydrocarbons associated with particulates in Pittsburgh air. 16(2) 67–71

Dickenson, Janet E. Control of Photochemical smog by alteration of initial reactant ratios. 16(6) 317–323

Drowley, W. B. Canadian activities in ambient air quality criteria and development of standards. 16(3) 131–134

——. Polynuclear aromatic hydrocarbons in urban atmospheres in Ontario. 16(9) 492–497

DuBois, L. The metal content of urban air. 16(2) 77–78

——. The analysis of carbon monoxide in urban air at the ppm level, and the "normal" carbon monoxide value. 16 (3) 135–139

Dugger, W. M., Jr. Physiological and biochemical effects of atmospheric oxidants on plants. 16(9) 467–471

Eckert, J. S. Use of packed beds for separation of entrained particles and fumes from an air stream. 16(2) 95–98

Edelman, S. The law of federal air pollution control. 16(10) 523–525

Edfors, M. On the determination of odor thresholds in air pollution control—an experimental field study on flue gases from sulfate cellulose plants. 16(2) 92–94

Edgerley, E., Jr. Concentration and recovery of atmospheric odor pollutants using activated carbon. 16(1) 25–28

Epstein, S. S. Two sensitive tests for carcinogens in the air. 16(10) 545–546

Faoro, R. B. An evaluation of CO_2 measurements as an indicator of air pollution. 16(4) 212–218

Feldstein, M. Hydrogen sulfide darkening of exterior paint. 16(1) 19–21

Ferguson, J. S. Some applications of microscopy to air pollution. 16(12) 669–672

Friberg, L. On the determination of odor thresholds in air pollution control—an experimental field study on flue gases from sulfate cellulose plants. 16(2) 92–94

Frizzola, J. A. A simplified method of estimating atmospheric diffusion parameters. 16(11) 594–596

Glenn, T. A., Jr. Regional air pollution warning system. 16(1) 22–24

Grames, L. D. Fume control in rubber processing by direct-flame incineration. 16(12) 673–676

Green, M. H. An air pollution index based on sulfur dioxide and smoke shade. 16(12) 703–706

Griswold, S. Smith. Federal air pollution prevention and abatement responsibilities and operations. 16(10) 526–529

Grove, E. The variability of dustfall analysis due to the container and the collecting fluid. 16(5) 263–265

Gruber, C. W. Soiling potential—a new method for measuring smoke emission. 16(5) 272–275

Hamming, W. J. Control of photochemical smog by alteration of initial reactant ratios. 16(6) 317–323

Harding, C. I. Measuring nonsteady flow in industrial vents. 16(1) 12–14

Heggestad, H. E. Ozone as a tobacco toxicant. 16(12) 691–694

Heller, A. N. The air resource management concept. 16(6) 307–309

——. Air resource management in the Chicago metropolitan area. 16(10) 536–540

Hendrickson, E. R. Measuring non-steady flow in industrial vents. 16(1) 12–14

Hepting, G. H. Air pollution impacts to some important species of pine. 16(2) 63–65

Herrick, R. A. Oxygen-lanced open hearth furnace fume cleaning with a glass fabric baghouse. 16(1) 7–11

Hitchcock, A. E. Studies on the measurement of fluoride in air and plant tissues by the Willard-Winter and semiautomated methods. 16(7) 367–371

——. The accumulation of fluorine by plants. 16(8) 412–417

Hochheiser, S. The effect of analytical method on indicated atmospheric SO_2 concentration. 16(5) 266–271

Hopper, C. J. Control of emissions through efficient use of atmospheric dispersion—a forecast system. 16(11) 606–608

Hovey, H. H. The development of air contaminant emission tables for nonprocess emissions. 16(7) 362–366

Huffstutler, K. K. Sources and quantities of fluorides evolved from the manufacture of fertilizer and related products. 16(12) 682–684

Jackson, M. W. Analysis for exhaust gas hydrocarbons—nondispersive infrared versus flame-ionization. 16(12) 697–702

Jacobson, J. S. Studies on the measurement of fluoride in air and plant tissues by the Willard-Winter and semiautomated methods. 16(7) 367–371

——. The accumulation of fluorine by plants. 16(8) 412–417

Jensen, G. A. Absorption of hydrogen sulfide and methyl mercaptan from dilute gas mixtures. 16(5) 248–253

Joba, E. L. The effects of air pollution on electrical contact materials: a field study. 16(3) 123–127

Jutze, G. A. Dynamic calibration of an acid aerosol analyzer. 16(6) 310–313

Kaiser, E. R. Prospects for reducing particulate emissions from large incinerators. 16(6) 324

Katz, M. Canadian activities in ambient air quality criteria and development of standards. 16(3) 131–134

——. Summer ozone concentrations in southern Ontario in relation to photochemical aspects and vegetation damage. 16(4) 201–206

——. Limitations of the lead acetate impregnated paper tape method for hydrogen sulfide. 16(6) 328–330

——. Polynuclear aromatic hydrocarbons in urban atmospheres in Ontario. 16(9) 492–497

Kauper, E. K. Control of emissions through efficient use of atmospheric dispersion—a forecast system. 16(11) 606–608

Kiyoura, R. Studies on the removal of sulfur dioxide from hot flue gases to prevent air pollution. 16(9) 488–489

Koppe, R. K. An air quality study in the vicinity of Lewiston, Idaho, and Clarkston, Washington. 16(6) 314–316

Koukol, Jane. Physiologican and biochemical effects of atmospheric oxidants on plants. 16(9) 467–471

Lemmons, T. J. A low-level air sampling and meteorological sounding system. 16(4) 207–211

Leone, I. A. Effect of nitrogen nutrition on the response of tobacco to ozone in the atmosphere. 16(4) 191–196

Lindvall, T. On the determination of odor thresholds in air pollution control—an experimental field study on flue gases from sulfate cellulose plants. 16(2) 92–94

Linzon, S. N. Damage to eastern white pine by sulfur dioxide, semimature-tissue needle blight, and ozone. 16(3) 140–144

Lodge, J. P., Jr. The use of hypodermic needles as critical orifices in air sampling. 16(4) 197–200

Loring, W. People and air pollution: a study of attitudes in Buffalo, N. Y. 16(5) 245–247

Ludmann, W. F. The effect of analytical method on indicated atmospheric SO_2 concentration. 16(5) 266–271

Lynn, D. A. Air pollution in six major U. S. cities as measured by the continuous air monitoring program. 16(4) 186–190

Malrick, R. A. The usual and unusual in tax exemptions of air pollution control facilities. 16(9) 472–473

Mateer, E. H. Contribution of burning of agricultural wastes to photochemical air pollution. 16(12) 685–690

McCune, D. C. Studies on the measurement of fluoride in air and plant tissues by the Willard-Winter and semiautomated methods. 16(7) 367–371

——. The accumulation of fluorine by plants. 16(8) 412–417

McMichael, W. F. Automotive emissions after hot and cold starts in summer and winter. 16(9) 474–477

McMullen, T. B. Air pollution in six major U. S. cities as measured by the continuous air monitoring program. 16(4) 186–190

Megonnell, W. H. Developing abatement policies under the clean air act. 16(5) 254–256

——. Federal air pollution prevention and abatement responsibilities and operations. 16(10) 526–529

Meland, B. R. A study of field burning under varying environmental conditions. 16(9) 481–484

Meredith, H. H., Jr. Platitudes or performance? 16(10) 547–549

Meyers, F. D. Fume incineration with combustion air at elevated temperature. 16(7) 378–382

Middleton, J. T. Contribution of burning of agricultural wastes to photochemical air pollution. 16(12) 685–690

Monkman, J. L. The metal content of urban air. 16(2) 77–78

——. The analysis of carbon monoxide in urban air at the ppm level, and the "normal" carbon monoxide value. 16(3) 135–139

Moore, G. E. Polynuclear aromatic hydrocarbons in urban atmospheres in Ontario. 16(9) 492–497

Morrow, J. I. Enhanced desorption of atmospheric samples from activated carbon. 16(7) 383–385

Nakadoi, T. Fluorophotometric determination of trace amounts of atmospheric ozone. 16(11) 614–617

Neligan, R. E. Continuous monitoring of methane and other hydrocarbons in urban atmospheres. 16(2) 87–91

Olsen, J. W. Oxygen-lanced open hearth furnace fume cleaning with a glass fabric baghouse. 16(1) 7–11

Ortman, G. C. Continuous monitoring of methane and other hydrocarbons in urban atmospheres. 16(2) 87–91

Osterli, V. P. Contribution of burning of agricultural wastes to photochemical air pollution. 16(12) 685–690

Pack, M. R. Problems of relating atmospheric analyses to effect of air pollution on agriculture. 16(4) 219–223

——. Response of tomato fruiting to hydrogen fluoride as influenced by calcium nutrition. 16(10) 541–544

Palmer, R. L. Physiological and biochemical effects of atmospheric oxidants on plants. 16(9) 467–471

TITLE INDEX

For the convenience of the reader, this index has been subdivided into ten broad classifications, with titles listed alphabetically within each category. The groupings are as follows:

1. The Sources and Nature of Air Pollution
2. The Transport of Air Pollution
3. The Effects of Air Pollution
4. Controlling Air Pollution
5. Methods of Measurement
   (sampling, detection, evaluation, techniques, testing)
6. Survey Results and Interpretation
7. The Law and Air Pollution
   (legislation, administration, enforcement, standards, programs)
8. Education and Information Programs
9. Creating a Climate for Control
   (public relations, management concepts, social aspects)
10. Technical Reports from Conferences and Committees
    (not otherwise classified)

1. THE SOURCES AND NATURE OF AIR POLLUTION

Agricultural burning. C. S. Brandt. 16 (2) 85–86

Automotive emissions after hot and cold starts in summer and winter. W. F. McMichael and J. E. Sigsby, Jr. 16 (9) 474–477

Contribution of burning of agricultural wastes to photochemical air pollution. E. F. Darley, F. R. Burleson, E. H. Mateer, J. T. Middleton, and V. P. Osterli. 16(12) 685–690

The development of air contaminant emission tables for nonprocess emissions. H. H. Hovey, A. Risman, and J. F. Cunnan. 16(7) 362–366

Emissions from carbureted and timed port fuel injected engines. R. C. Stahman and A. H. Rose, Jr. 16(1) 15–18

Formation of oxides of nitrogen in pulverized coal combustion. D. Bienstock, R. L. Amsler, and E. R. Bauer, Jr. 16(8) 442–445

The metal content of urban air. L. DuBois, T. Teichman, J. M. Airth, and J. L. Monkman. 16(2) 77–78

Polynuclear aromatic hydrocarbons associated with particulates in Pittsburgh air. L. DeMaio, and M. Corn. 16(2) 67–71

Polynuclear aromatic hydrocarbons in urban atmospheres in Ontario. G. E. Moore, M. Katz, and W. B. Drowley. 16(9) 492–497

Rate constant ratios during nitrogen dioxide photolysis. E. A. Schuck, E. R. Stephens, and R. R. Schrock. 16(12) 695–696

Sources and quantities of fluorides evolved from the manufacture of fertilizer and related products. K. K. Huffstutler and W. E. Starnes. 16(12) 682–684

2. TRANSPORT OF AIR POLLUTION

Comparison of wind at 500 feet over Minneapolis and Louisville with geostrophic wind. R. J. Deland and F. S. 16(11) 597–600

Control of emissions through efficient use of atmospheric dispersion—a forecast system. E. K. Kauper and C. J. Hopper. 16(11) 606–608

A low-level air sampling and meteorological sounding system. G. A. Cleeves, T. J. Lemmons, and C. A. Clemons. 16(4) 207–211

The seasonal, weekly, and daily cycles of atmospheric smoke content in Central Montreal. P. W. Summers. 16(8) 432–438

A simplified method of estimating atmospheric diffusion parameters. I. A. Singer, J. A. Frizzola, and M. E. Smith. 16(11) 594–596

A study of field burning under varying environmental conditions. B. R. Meland and R. W. Boubel. 16(9) 481–484

A tracer study of dispersion over a city. F. Pooler, Jr. 16(12) 677–681

3. EFFECTS OF AIR POLLUTION

The accumulation of fluorine by plants. J. S. Jacobson, L. H. Weinstein, D. C. McCune, and A. E. Hitchcock. 16(8) 412–417

Air pollution impacts to some important species of pine. G. H. Hepting. 16 (2) 63–65

Damage to Eastern white pine by sulfur dioxide, semimature-tissue needle blight, and ozone. S. N. Linzon. 16 (3) 140–144

Effect of nitrogen nutrition on the response of tobacco to ozone in the atmosphere. I. A. Leone, E. Brennan, and R. H. Daines. 16(4) 191–196

The effects of air pollution on electrical contact materials: A field study. R. V. Chiarenzelli and E. L. Joba 16(3) 123–127

The exposure to carbon monoxide of occupants of vehicles moving in heavy traffic. R. M. Brice and J. F. Roesler. 16(11) 597–600

Hydrogen sulfide darkening of exterior paint. H. C. Wohlers and M. Feldstein. 16(1) 19–21

Ozone as a tobacco toxicant. H. E. Heggestad. 16(12) 691–694

Physiological and biochemical effects of atmospheric oxidants on plant. W. M. Dugger, Jr., Jane Koukol, and R. L. Palmer. 16(9) 467–471

Problems of relating atmospheric analyses to effect of air pollution on agriculture. M. R. Pack and D. F. Adams. 16(4) 219–223

Response of tomato fruiting to hydrogen fluoride as influenced by calcium nutrition. M. R. Pack. 16(10) 541–544

Studies on the effect of Cement-Kiln dust on vegetation. E. F. Darley. 16(3) 145–150

Summer ozone concentrations in southern Ontario in relation to photochemical Aspects and Vegetation damage. A. F. Cole and M. Katz. 16(4) 201–206

4. CONTROLLING AIR POLLUTION

Absorption of hydrogen sulfide and methyl mercaptan from dilute gas mixtures. G. A. Jensen, D. F. Adams, and H. Stern. 16(5) 248–253

Air pollution abatement in the ceramic industry. M. Bozsin. 16(6) 332–333

Application of polyurethane foam filters for respirable dust separation. J. F. Roesler. 16(1) 30–34

BOP Air Cleaning Experiences. C. M. Parker. 16(8) 446–448

Concentration and recovery of atmospheric odor pollutants using activated carbon. D. L. Brooman and E. Edgerley, Jr. 16(1) 25–28

Control of photochemical smog by alteration of initial reactant ratios. W. J. Hamming and Janet E. Dickenson. 16(6) 317–323

Development of an air pollution control program at Comincos Kimberley operation. A. F. Snowball. 16(2) 59–62

The development of open pit incinerators for solid waste disposal. L. C. Peskin. 16(10) 550–551

Effect of dust concentration upon the gas-flow capacity of a cyclonic collector. W. T. Sproull. 16(8) 439–441
Electric car system introduced. 16(5) 452
An example of planning for pollution control in kraft pulping. M. Benjamin. 16(3) 128–130
Fume control in rubber processing by direct-flame incineration. A. G. Sandomirsky, D. M. Benforado, L. D. Grames, and C. E. Pauletta. 16(12) 673–676
Fume incineration with combustion air at elevated temperature. F. D. Meyers and J. Waitkus. 16(7) 378–382
Oxygen-lanced open hearth furnace fume cleaning with a glass fabric baghouse. R. A. Herrick, J. W. Olsen, and F. A. Ray. 16(1) 7–11
Prospects for reducing particulate emissions from large incinerators. E. R. Kaiser. 16(6) 324
Studies on the removal of sulfur dioxide from hot flue gases to prevent air pollution. R. Kiyoura. 16(9) 488–489
Use of packed beds for separation of entrained particles and fumes from an air stream. J. S. Eckert. 16(2) 95–98

5. METHODS OF MEASUREMENT

(sampling, detection, evaluation, techniques, testing)

Analysis for exhaust gas hydrocarbons—nondispersive infrared versus flame-ionization. M. W. Jackson. 16(12) 697–702
The analysis of carbon monoxide in Urban air at the ppm level, and the "normal" carbon monoxide value. L. Dubois, A. Zdrojewski, and J. L. Monkman. 16(3) 135–139
Continuous air pollution monitoring program will use three mobile laboratories. 16(5) 276–277
Continuous monitoring of methane and other hydrocarbons in urban atmospheres. A. P. Altshuller, G. C. Ortman, B. E. Saltzman, and R. E. Neligan. 16(2) 87–91
Dynamic calibration of acid aerosol analyzer. F. P. Scaringelli, R. E. Boone, and G. A. Jutze. 16(6) 310–313
The effect of analytical method on indicated atmospheric SO_2 concentration. S. Hochheiser, J. Santner, and W. F. Ludmann. 16(5) 266–271
Enhanced desorption of atmospheric samples from activated carbon. A. Turk, J. I. Morrow, S. H. Stoldt, and W. Baecht. 16(7) 383–385
An evaluation of CO_2 measurements as an indicator of air pollution. J. F. Clarke and R. B. Faoro. 16(4) 212–218
An evaluation of techniques for the determination of the photochemical reactivity of organic emissions. A. P. Altshuller. 16(5) 257–260
Fluorophotometric determination of trace amounts of atmospheric ozone. H. Watanabe and T. Nakadoi. 16(11) 614–617
Gas dilution apparatus for preparing reproducible dynamic gas mixtures in any desired concentration and complexity. M. D. Thomas and R. E. Amtower. 16(11) 618–623
The identification and determination of airborne particulates by means of the ring oven technique. P. W. West. 16(11) 601–603
An inertial-type particle separator for collecting large samples. W. D. Conner. 16(1) 35–38
Limitations of the lead acetate impregnated paper tape method for hydrogen sulfide. H. P. Sanderson, R. Thomas, and M. Katz. 16(6) 328–330
Measuring non-steady flow in industrial vents. C. I. Harding, E. R. Hendrickson, and R. S. Sholtes. 16(1) 12–14
A new tape reagent for the determination of hydrogen sulfide in air. J. P. Paré. 16(6) 325–327
On the determination of odor thresholds in air pollution control—an experimental field study on flue gases from sulfate cellulose plants. R. Cederlöf, M. Edfors, L. Friberg, and T. Lindvall. 16(2) 92–94
A rapid titrimetric method for sulfate in lead dioxide exposed to atmospheric sulfur pollution. A. C. Rayner. 16(8) 418–431
Recommended standard method for continuing dust fall survey (APM-1, Revision 1). TR-2 Air Pollution Measurements Committee. 16(7) 372–377
Soiling potential—a new method for measuring smoke emission. C. W. Gruber and C. E. Schumann. 16(5) 272–275
Some applications of microscopy to air pollution. J. S. Ferguson and Eleanor G. Sheridan. 16(12) 669–672
Studies on the measurement of fluoride in air and plant tissues by the Willard-Winter and semiautomated methods. J. S. Jacobson, D. C. McCune, L. H. Weinstein, and A. E. Hitchcock. 16(7) 367–371
Theoretical limits of errors due to anisokinetic sampling of particulate matter. V. Vitols. 16(2) 79–83
Two sensitive tests for carcinogens in the air. S. S. Epstein. 16(10) 545–546
The use of hypodermic needles as critical orifices in air sampling. J. P. Lodge, Jr., J. B. Pate, B. E. Ammons, and G. A. Swanson. 16(4) 197–200
The variability of dustfall analysis due to the container and the collecting fluid. J. Stockham, S. Radner, and E. Grove. 16(5) 263–265

6. SURVEY RESULTS AND INTERPRETATION

Air pollution in six major U. S. cities as measured by the continuous air monitoring program. D. A. Lynn and T. B. McMullen. 16(4) 186–190
An air quality study in the vicinity of Lewiston, Idaho, and Clarkston, Washington. D. F. Adams and R. K. Koppe. 16(6) 314–316
Inventory of emission for the city of Chicago. A. R. Dammkoehler. 16(3) 151–155

7. THE LAW AND AIR POLLUTION

(legislation, administration, enforcement, standards, programs)

Air monitoring reflects air pollution control activity. B. D. Tebbens. 16(5) 261–262
Air pollution considerations in the planning and zoning of a large, rapidly growing municipality. W. Wronski, E. W. Anderson, A. E. Berry, A. P. Bernhart, and H. A. Belyea. 16(3) 157–158
An air pollution index based on sulfur dioxide and smoke shade. M. H. Green. 16(12) 703–706
The air resource management concept. A. N. Heller, J. J. Schueneman, and J. D. Williams. 16(6) 307–309
Air resource management in the Chicago metropolitan area. W. J. Stanley and A. N. Heller. 16(10) 536–540
Canadian activities in ambient air quality criteria and development of standards. M. Katz and W. B. Drowley. 16(3) 131–134
Developing abatement policies under the clean air act. W. H. Megonnell. 16(5) 254–256
Federal activity in developing air quality criteria. E. T. Blomquist. 16(10) 530–531
Federal air pollution prevention and abatement responsibilities and operations. W. H. Megonnell and S. Smith Griswold. 16(10) 526–529
The law of federal air pollution control. S. Edelman. 16(10) 523–525
New York State's action for clean air program. G. Thomas. 16(4) 183–185
Regional air pollution warning system. T. A. Glenn, Jr. 16(1) 22–24
The role of the computer in air pollution control. W. J. Stanley. 16(2) 100–101
State and community reactions to the federal air pollution program. V. H. Sussman. 16(9) 485–487
The usual and unusual in tax exemptions of air pollution control facilities. R. A. Malrick. 16(9) 472–473

8. EDUCATION AND INFORMATION PROGRAMS

The Air Pollution Control Institute of the University of Southern California: a year's experience. G. B. Siegel. 16(12) 707–709
Cleaner air through on-the-job training programs in Chattanooga. 16(6) 340
Existing air pollution training activities. S-11 Education and Training Committee (APCA). 16(11) 610–613
The National Air Pollution Technical Information Center: its operation and services. R. Porter. 16(9) 478–480

9. CREATING A CLIMATE FOR CONTROL

(public relations, management concepts, social aspects)

Emerging concepts of air pollution problems, as seen by the political scientist. R. Perman. 16(10) 532–535
A new approach to the politics of pollution. W. B. Rumford. 16(7) 359–361
People and air pollution: a study of attitudes in Buffalo, N. Y. I. DeGroot, W. Loring, A. Rihm, Jr., S. W. Samuels, and W. Winkelstein, Jr. 16(5) 245–247
Platitudes or performance? H. H. Meredith, Jr. 16(10) 547–549
Public awareness and concern with air pollution in the St. Louis Metropolitan area. J. Schusky. 16(2) 72–76
Public opinion and community involvement. A. E. Settle. 16(9) 490–491

10. TECHNICAL REPORTS FROM CONFERENCES AND COMMITTEES

(not otherwise classified)

Final report from London. Reviews of technical sessions presented by Rapporteurs at International Clean Air Congress held in London in October 1966. 16(12) 653–668
National incinerator conference covers emissions control aspects of incinerators. 16(6) 334–335
A survey of global air pollution. Continental reports presented at the First International Clean Air Congress held in London in October 1966. 16(11) 573–593
